Hazardous Weather

Hazardous Weather

Periods of showers with a few thunderstorms are expected to continue Wednesday. The best chance for rain will occur Wednesday morning. Some sleet is possible across the far northwestern Panhandles early in the morning as well.

It is going to be cold, blustery, cloudy and showery today. Highs will be mostly in the 40s, complete with breezy northerly winds that will make it feel even colder. There will be scattered to numerous showers and areas of drizzle too, with the best chances gradually shifting eastward through the day. Pockets of heavy rain will be possible, primarily off the Caprock.

What a difference a day makes. A strong cold front will move across the area tonight. High temperatures on Wednesday will be almost 30 degrees cooler than we saw on Tuesday. We will see lots of clouds with scattered light rain showers. Winds will be around 10 to 15 mph. It will feel very much like a Fall day.

Hazardous Weather

Radar Update

Radar Scan Time: 8:06 AM CDT

Weather Forecast Office
San Angelo, TX
Issued Sep 09, 2020 8:08 AM CDT

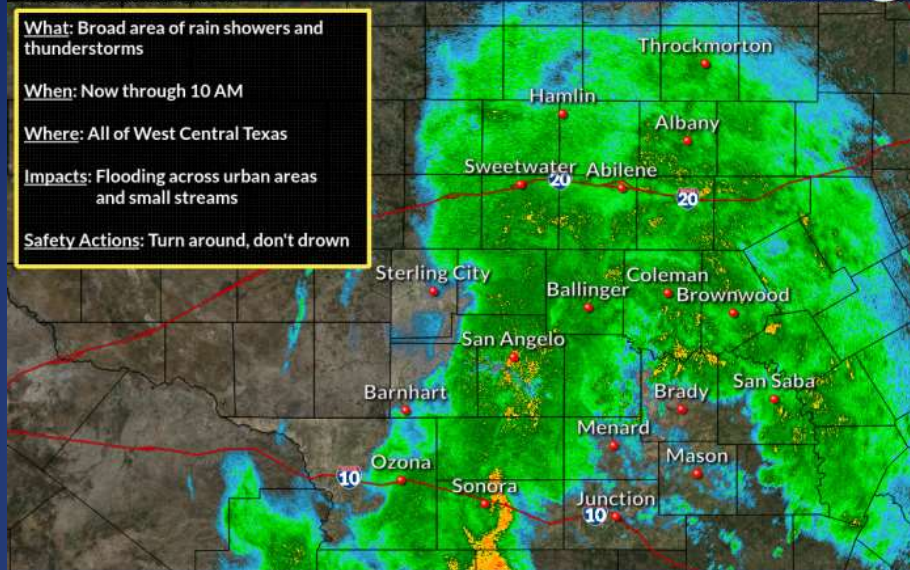

What: Broad area of rain showers and thunderstorms

When: Now through 10 AM

Where: All of West Central Texas

Impacts: Flooding across urban areas and small streams

Safety Actions: Turn around, don't drown

NWSSanAngelo

weather.gov/sjt

Numerous showers and thunderstorms will affect West Central Texas through daybreak. Heavy downpours and localized flooding is possible, especially across portions of the Concho Valley and Northern Edwards Plateau.

Wednesday's Cold Front

A cold front will slowly spread east through the day

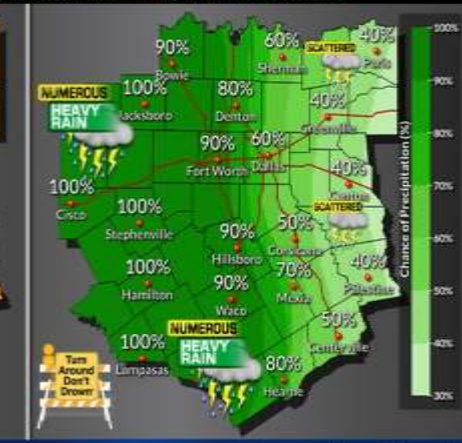

Weather Forecast Office
Fort Worth, TX
Issued September 9, 2020 3:31 AM CT

- Showers and thunderstorms are expected across much of the area today & most widespread west of I-35/35W
- Heavy rain may lead to localized flooding along and west of I-35/35W. Severe weather is not expected.
- A cold front will slowly move through Western North and Central Texas today...
- Expect cold front to be along I-35 by around sunset. Front timing may move up/back a couple hours.
- Locations between Jacksboro and Dallas may experience falling temperatures through the afternoon (circled area)

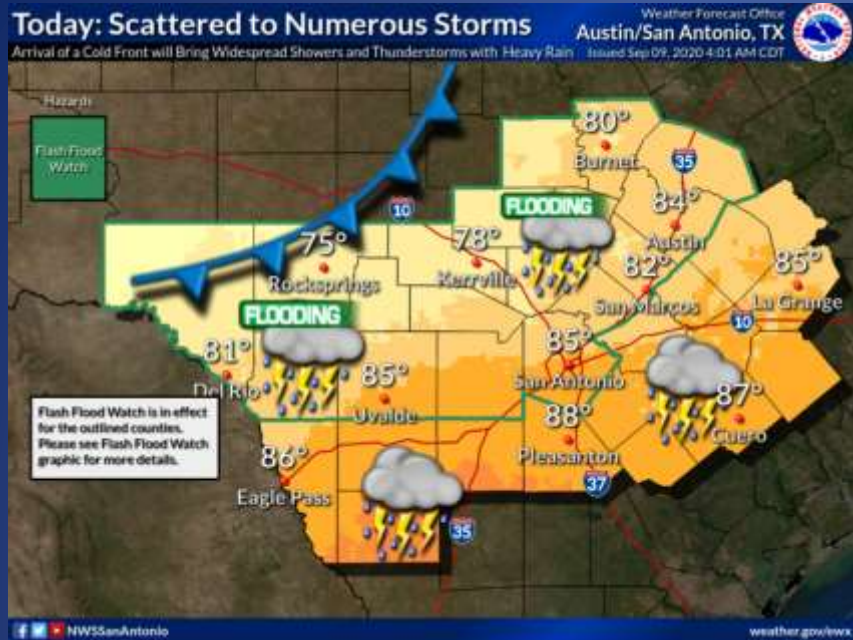

NWSFortWorth

weather.gov/fortworth

A cold front will begin to make its way through North Texas today! Widespread showers and thunderstorms are expected through the day with heavy rain likely for the areas along and west of I-35/35W. This may lead to localized flooding this afternoon and evening. The cold front should slowly move east through the day and be roughly along the I-35 corridor by sunset...expect falling temperatures behind the front.

Hazardous Weather

Scattered to numerous thunderstorms continue over South Central Texas today with the arrival of a cold front. Locally heavy rains are likely into this evening. Please see Flash Flood Watch graphic for more details

Highs in the low to mid 90s with showers and thunderstorms east of I-45.

Hazardous Weather

Scattered to numerous showers and thunderstorms are expected across the region today. Rainfall may be heavy at times. Otherwise, temps will range from the mid 80s to mid 90s with a persistent southeasterly wind.

Scattered showers with a few thunderstorms will be possible today with better chances on the coast and in the northern ranchlands. Temperatures will be near normal for September with highs in the mid 90s.
